

TÉCNICA DE PROGRAMAÇÃO II

Técnicas de Programação II
Profº Maylon Henrique de Oliveira

Exercício 1

Passagem

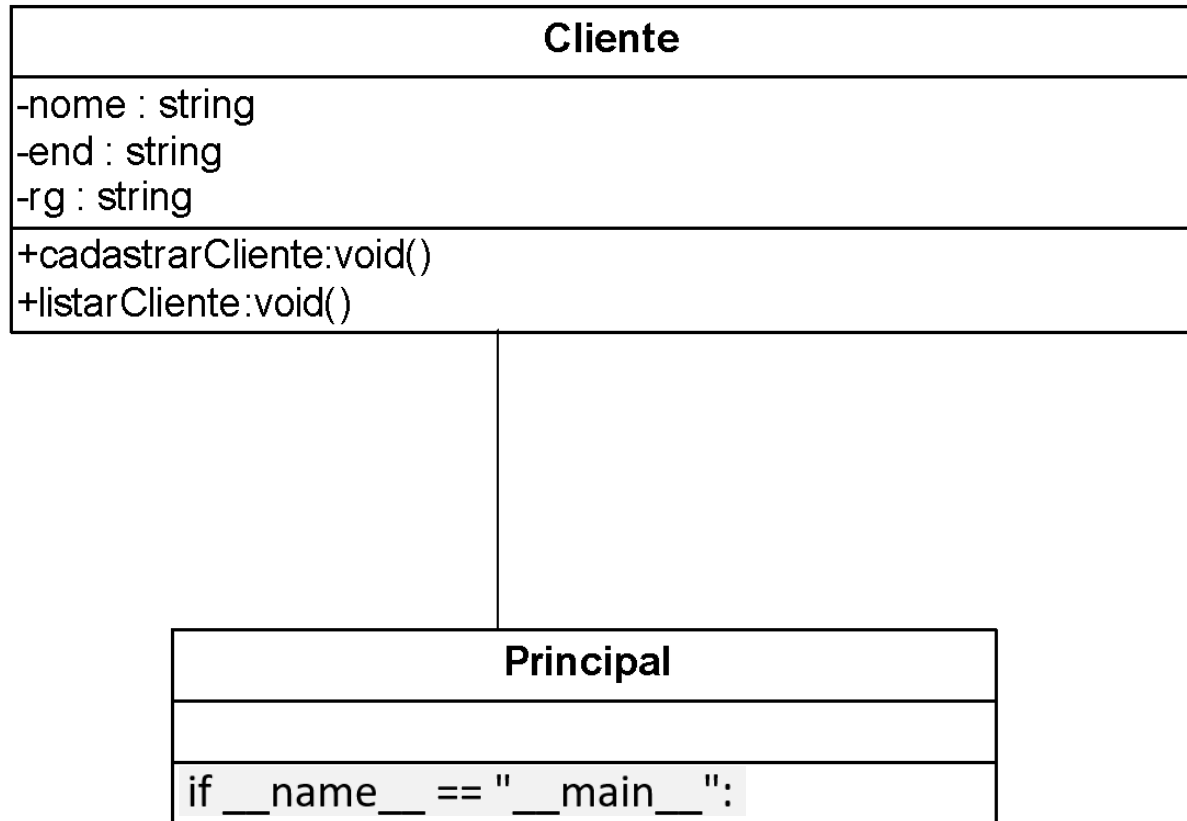

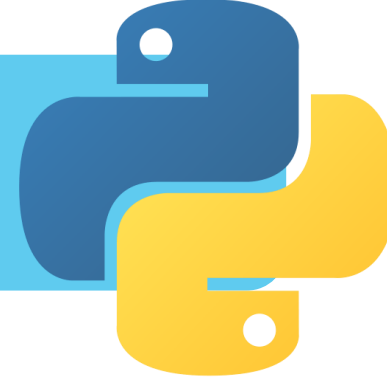

- nomePassageiro : String
- telefone: String
- RG: String
- localViagem: String
- data: String
- horário: String
- numpoltrona: String

- + cadastrarDadosPassageiros(): void
- + cadastrarDadosPassagem():void
- + mostrarDadosPassageiro():void
- + mostrarDadosPassagem():void

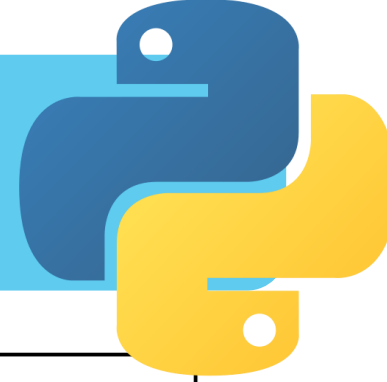

Principal

```
if __name__ == "__main__":
```

Exercício 2

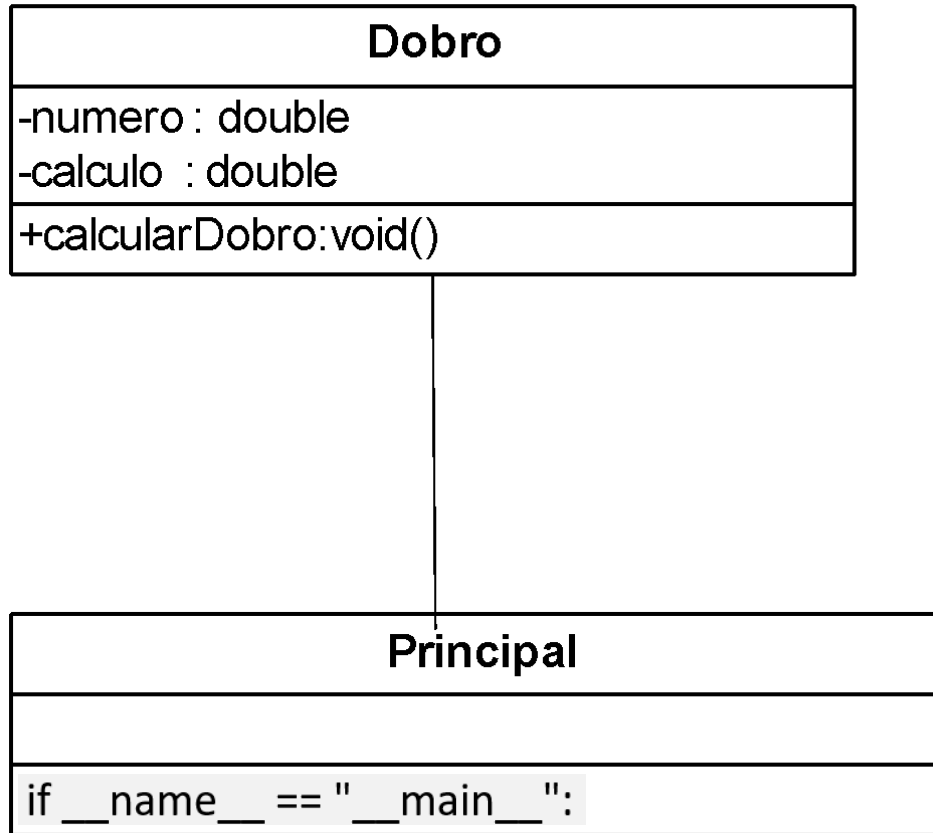

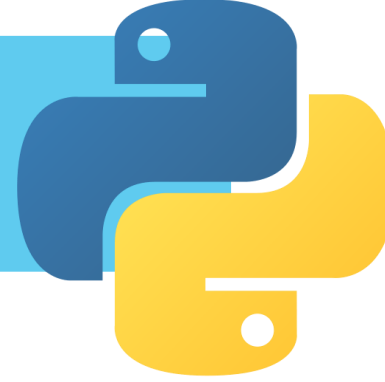

Exercício 3

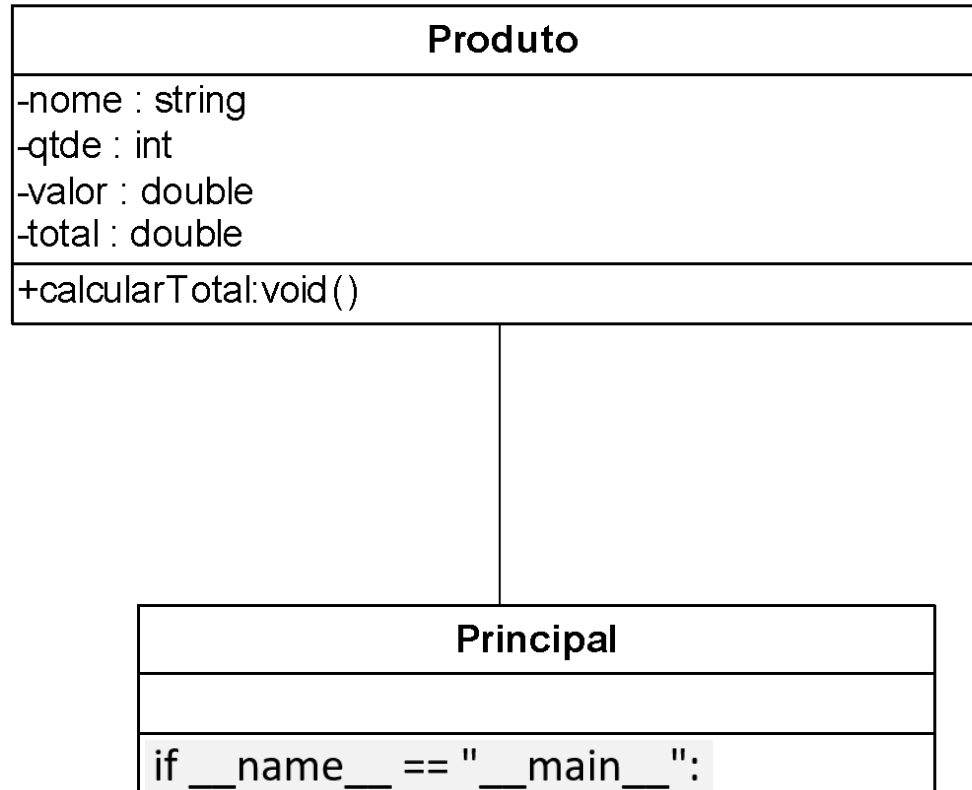

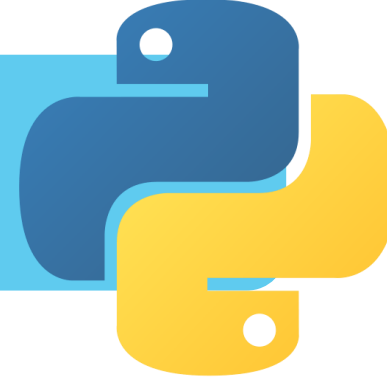

Fornecedores
-nomeFornecedor : string -nomeProduto : string -descricaoProduto : string
+cadastrarFornecedor:void() +listarFornecedor:void()

Principal
if __name__ == "__main__":

Exercício 4

Exercício 5

Exercício 6
